SUMMARY

I am a final-semester Computer Science student at FAST-NUCES Islamabad with a background in game development and blockchain. I'm currently deep-diving into Generative AI and Agentic AI through my university coursework, where I'm learning how to build and evaluate autonomous agents. My experience at M-Labs and my work on the Medlock blockchain project (My Final Year Project) have taught me how to be precise, find logic errors, and handle complex technical requirements. I'm looking for a part-time role where I can apply my analytical skills and my current studies in AI to help test and improve modern models.

EXPERIENCE

*DevelopersHub Corporation, **Mobile App Development Intern***

Jul 2025 – Aug 2025

- Completed a six-week virtual internship focused on mobile application development standards.
- Received the "Best Award" for exceptional performance and significant contributions to the program.

*M-Labs, **Intern Game Developer***

Jun 2024 - Aug 2024

- Developed a 3D game in Unity from scratch, enhancing game development skills and programming.
- Collaborated with designers and testers, ensuring seamless integration of creative and technical elements.

EDUCATION

FAST NUCES Islamabad

Bachelor of Computer Science

Beaconhouse Margalla A-Levels

GCE A-Levels

*Grades: 4A**s*

Beaconhouse Margalla Islamabad

GCE O-Levels

*Grades: 6A**s and 2A's*

SKILLS

• Generative AI • Agentic AI • Prompt Engineering • Programming (C++, C, Java, Python) • High-Performance Computing • Game Development (Unity, Unreal, SFML) • Leadership

HONORS & AWARDS

Web Social Party Game Jam

NaSCon • Apr 2025

Got Second position in the Game Jam hosted by Grayhat at NaSCon 2025. I created a card game in Unity 2D for this competition.

CERTIFICATIONS

- Blockchain Council → Certified Blockchain Developer
- Coursera → IBM Data Science Specialization (In Progress)
- Coursera → Meta, Introduction to Android app development
- Coursera → Google, Crash course on Python
- Coursera → Google, Foundations of Project Management
- Udemy → Learning Ethical Hacking from Scratch
